Add

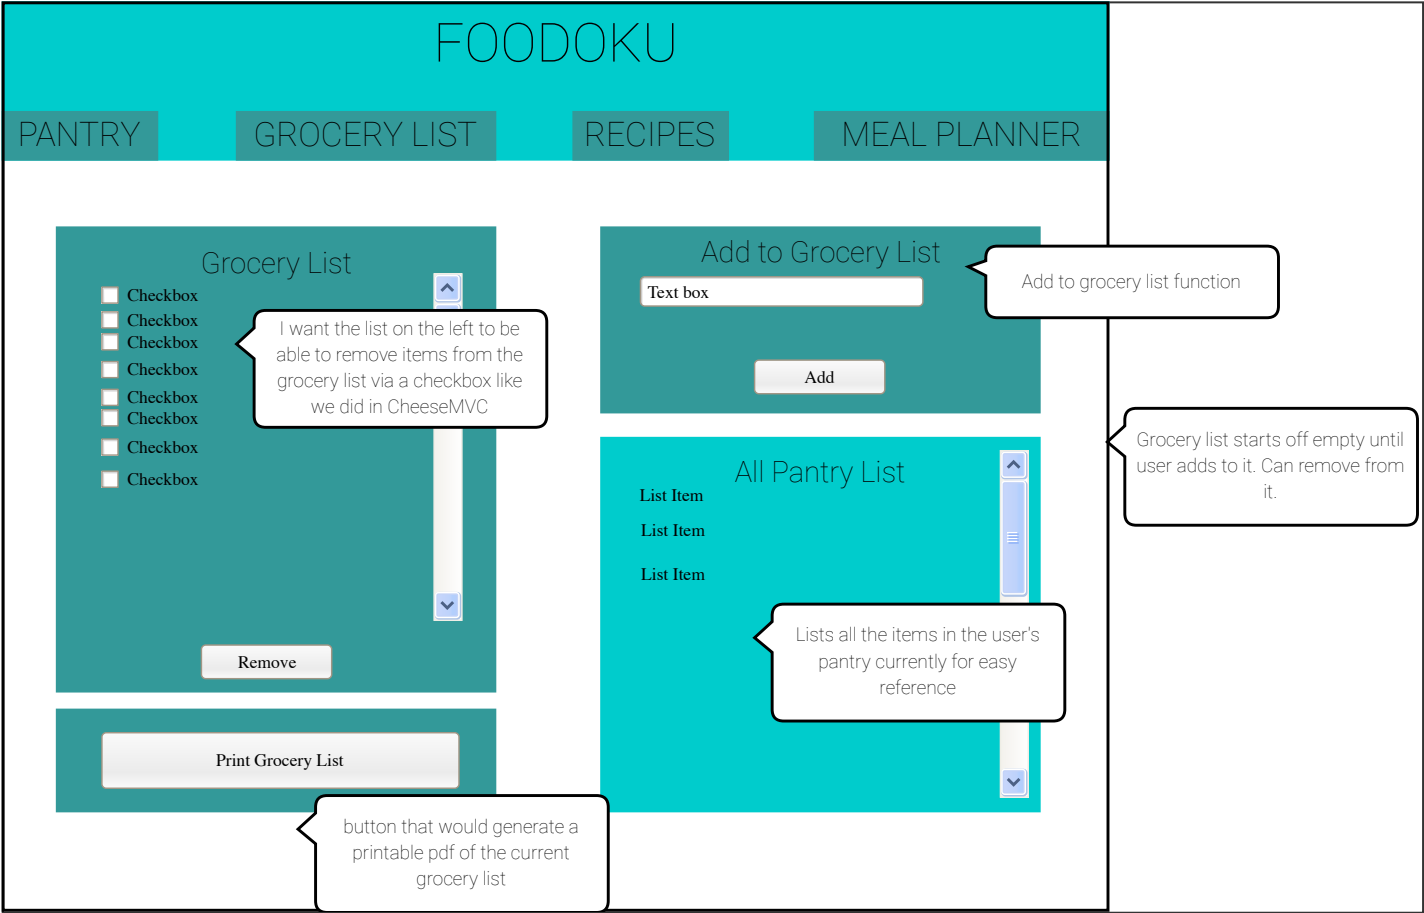

I want to be able to change the location of the items in my pantry list

I want the list on the left to be able to remove items from the pantry via a checkbox like we did in CheeseMVC

Ability to add multiple items to pantry -- plus designate where they are located

Having a property of a pantry/food object be a list of where it is located is ideal

SAVE AS PDF

SAVE TO MEAL PLAN ARCHIVE

be able to edit individual times (morning, afternoon, and evening) in the calender

need to add Sunday, just didn't have enough space on here

user can save pantry as a PDF, which will pop up in another window

user can have a meal plan archive, might need to be a form
